# Server Room Function

### 1 Operation

Cooling operation can be performed even in the low outdoor temperature and low humidity environment. In addition, the following interlock operation is possible by connecting two indoor units with a cable.

Output error

- Rotating operation
- (Two units operate alternately)

Backup operation
 (In case one unit breaks down, the other unit starts operation automatically.)

Support operation

(Both units operate simultaneously when the loaded capacity is not enough with one unit)

# Other functions

1 Outdoor unit low noise mode

The reduction of noise at night can be set by remote controller.
2 50m long piping Length

Long piping length allow to extend to 50m to support installing indoor unit in center of building.

**3** KNX / Modbus connection Cooperation with external BMS is possible. (with option)

### Human Sensor

The sensor detects the movement of people in the room and optimises the power consumption of the unit by automatically adjusting the operating mode.

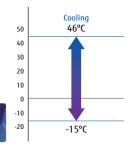

(Can be disabled for server rooms)

### 2 Low ambient operation

- Stable cooling operation is guaranteed down to -15°C outdoor temperature.
- Keep high sensible cooling performance (Approx. 75% capacity of rated condition) at -15°C outdoor temperature.

(Room temperature condition: DB 27 °C WB 19 °C)

- Server room function can
- be set at site.

### Feature explanation

Human sensor : Human sensor detects the movement of people in the room and judges whether the energy saving operation.

Economy mode : Thermostat setting automatically changes according to the temperature to avoid unnecessary cooling and heating.

Powerful mode : Operation at maximum air flow and

compressor speed, and quickly makes the room

comfortable.

10°C HEAT operation : The room temperature can be set to

selected.

Double swing automatic : Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.

Auto-changeover : The unit automatically switches

between heating and cooling modes based on your

temperature setting and the room temperature.

Low noise mode : Sound noise level of outdoor unit can be

Automatic fan speed : The micro-computer automatically adjusts the airflow effectively to follow the changes of room temperature.

Auto restart : In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once power supply is restored.

Sleep timer: The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.

Program timer : This digital timer allows selection of one

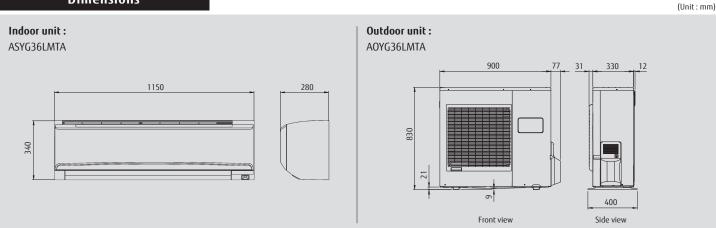

of four options: ON, OFF, ON  $\rightarrow$  OFF or OFF  $\rightarrow$  ON.

Weekly timer : Different ON-OFF times can be set for each day.
